Bridges 90 Day Review

Click the "Case Review" tab in SACWIS. This will allow you to:

- Review the current plan and answer questions in SACWIS.
- Update the Bridges Plan (there will be a number of questions to answer about goals). This is where you can add progress toward goals, end date if me or add new ones. Also, please note you do not have to wait until the 90 day review update the plan. Print and have YA sign. Depending in timing, this new plan may have to be submitted for either the Best Interest or Annual Redetermination Hearing at least 14 days prior to the hearing.
- There is also a link to do a reassessment of the Strengths and Growth Opportunities Section of the Bridges Assessment

Separately from the Case Review tab:

- The Tier Assessment must be re-accomplished
- Eligibility documents are gathered with the most current information and maintained in the paper file until the document imaging is functional in SACWIS.

Other Reminders:

- Update person record with any new information derived over the past 90 days
- If out of eligibility, print and discuss the Notice of Ineligibility form located in SAWIS under forms and notices.
- Supervisors should have documented case reviews and supervision sessions with Liaison
- Ensure all 90 day review work is logged in activity logs
- Reviews are completed with the young adult. The strengths and growth opportunities section (within the Reassessment) is the only section that can be done separately as it is a place where the worker can identify domains that they would suggest the YA direct attention in the future even if the YA is not ready or willing at that point.

The following link is to the Knowledge Base Article (KBA) that gives step-by-step direction on how to complete the Bridges Review in SACWIS:
